DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the last step recited should relate back to the preamble of the claim in order to provide a nexus between applicant's recited steps and the method defined by claim 1. Examiner suggests including, in the "treating" step, a recitation --in order to conduct R chemical reactions--, or language similar to that.

In claims 2-11, "A method" should be --The method--, as there is only one method defined by claim 1.

Allowable Subject Matter

Claims 1-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The following is a statement of reasons for the indication of allowable subject matter: Applicant's arguments are persuasive. Nova does not teach providing information to the user interface of the starting materials and desired functionality of the reaction product, allowing the computer to design an appropriate reaction to achieve the desired functionality and performing the reaction to obtain a reaction product.
